Calculate the Price of your

Digital Transfer

1. Multiply the area of the design (height x width) in inches. (Round up to the next whole square inch.)
 (Example: $3.75 \times 5.14 = 19.265$ square inches - round up to 20 square inch).
2. Choose your quantity break.
3. Multiply the square inches by the price under the quantity of pieces needed.
 (Example: $20 \text{ square inch} \times .12 = \$2.40 / \text{piece}$).
